About Face!

A cutting-edge new treatment and a sleek new Gold Coast med spa are giving the beauty scene a face-lift

Beata Zwolinski, co-owner of L'Etoile Salon & Spa, is offering the country's first-ever **Stem Cell Mask**—an organic, allergy-free, cruelty-free product with potential to shed a decade from your face (sans knives and needles) in just six weeks. The stem cells, which are ethically harvested from sheep raised on medicinal farms in New Zealand, de-age skin by producing increased collagen. Each session (six total) begins with light exposure before six layers of stem cell mask are applied to the face. 2903 N. Broadway St., 773.4

After a complete renovation, Dr. Vesna Skul's Center for Well-Being has been reborn as **Cellular Intelligence**, a sleek silver-and-white spa destination with some of the city's best estheticians on staff. Overseen by acclaimed dermatologist Vesna Skul, CI's anti-aging technologies include non-surgical facial sculpting, oxygen infusions, medical-grade facial treatments and various laser treatments. (Facial fillers and Botox are done exclusively by Skul.) Even better? The team behind CI has created a cutting-edge new line of skincare products that we have quickly become obsessed with. 100 E. Walton St., 312.255.1495, cimedspa.com. —K.K.H.
